

## **YEAR END REVIEW** **The Year in Pictures on Page 2**

### **Academic Graduations 2025**

- > Two boys have successfully graduated from college, taking a significant step toward independence and a hopeful future.
- > Two boys have successfully completed their high school education. They are applying for scholarships so that they can attend university.
- > One boy completed his primary education and will transfer to secondary school.

We celebrate these milestones with great pride. They stand as powerful evidence of what is possible when commitment, partnership, and consistent support transform lives.

### **Music Room – A Transformational Gift**

The boys are extremely grateful for the beautiful gift from Canada of the Life4Kids Music Room. This has been more than a facility; it has become a healing and expression space for our boys. The boys are taking turns learning and exploring different musical instruments. Through music, our boys feel loved, valued, and appreciated in a very special way.

### **Library, Computer Lab & Academic Growth**

The library (a gift from Canada) has also been a tremendous blessing. The boys are spending time reading, researching, and revising their schoolwork daily. This space has helped sharpen their academic skills, nurture discipline, and instill a love for learning.

### **Garden and Life Skills Development**

Our garden (also a gift from Canada) remains open and active, providing each boy with an opportunity to learn responsibility, patience, and the value of hard work and stewardship.

### **Household Support – Washing Machine**

We are sincerely grateful for the washing machine (from a Canadian supporter) which has greatly improved daily routines. This gift has made cleaning and laundry much

easier, more efficient, and more organized for the boys and staff. It has helped maintain cleanliness, dignity, and a well-ordered home.

### **Transport Support – The Vehicle Gift**

The gift of the car (from Norway) has greatly improved our daily operations. It has been especially helpful during emergencies, late-night medical needs, school activities, and general transport. This gift has brought safety, efficiency, and peace of mind.

### **Recreation and Information – Television**

We are also thankful for the gift of a television which the boys use for healthy entertainment and relaxation. It has become a positive tool for bonding and recreation. Additionally, it enables staff to stay informed by watching the news.

### **Boys' Well-Being and Holiday Program**

The boys are doing very well and are genuinely happy to be cared for and loved at Life4Kids.

During the holidays, we implemented a well-structured holiday program that has:

- Sharpened their talents and skills
- Supported trauma healing
- Improved confidence through games, sports, and creative activities
- Strengthened emotional and social growth

The transformation we continue to witness in their lives is deeply encouraging.

### **Looking Ahead to 2026**

As we step into the year 2026, our desire is for a year filled with growth, stability, provision, and even greater impact, as we continue serving the children entrusted to us.

### **Closing Wishes from CEO Jane**

On behalf of the Life4Kids family, we extend deepest appreciation for your love, kindness, generosity and support. We wish you all a Happy and Blessed New Year 2026. May the coming year reward your kindness and fill your hearts with joy and peace.
